Hand Tool / Parts Organizer / Janitorial Assistant for Fiberglass Step Ladders

Menomonee Falls, Wis. – (March 1st, 2019) – The ergonomic Ladder Tool Bin™ for most standard fiberglass step ladders is designed to keep hand tools and supplies organized and within a worker's reach. The product was created out of a real need for increased efficiency, safety (no more loose tools balancing on the top of your ladder)... and to reduce the up and down action typically done while working with step ladders. "No more wishing you had that tool on a table or bucket from across the room."

Developed by DeMore's Innovative Design, Inc., Menomonee Falls, Wis., the portable, rectangular-shaped organizer attaches to a standard fiberglass ladder with a 9" provide safety bolt that requires NO tools to secure. Constructed from reinforced, non-conductive, UV-protected orange polypropylene, the Ladder Tool Bin™ is designed to provide a safer, worry-free working area by keeping tools and parts off the top of the ladder and within reach.

The Ladder Tool Bin™ weighs 4 pounds and is designed to hold a sufficient number of tools for a wide range of tasks. It measures 24- by 8-inches, with two 8-inch deep compartments and a parts tray surrounding the 1-gallon can holder for loose parts, solvents and of course paint. A built-in handle for easy carrying is incorporated in the design. This little gem is Used by: Painters | Artists | Electricians | Carpenters | Plumbers | Auto Mechanics | Equipment repair | And More...!

Ladder Tool Bin
U.S. Patent No. D838,387

"Take your tools to a NEW HEIGHT"

"I have 34 years of construction experience and have worked on all types of elevating equipment, job sites & projects," states the inventor of the Ladder Tool Bin™. "I created this product to increase efficiency, for safety... and to eliminate the need to chase after tools for smaller; simple project and tasks."

The Ladder Tool Bin™ is intended for the residential, commercial, industrial, and maintenance industries, where ladders are commonly used. When used on a 3' or 4' step ladder this little device can be used as a portable work station in the home, garage and even when repairing your snow blower or lawn mower. The product is available through the manufacturer's website, www.laddertoolbin.com, and through a number of select distributors.
